

- Pace Digitek Limited, incorporated in 2007 and based in Bangalore, provides power management, energy solutions, and digital infrastructure services, specializing in government tender-based EPC projects across India, Africa, and Southeast Asia.
- Company is a leading solutions provider specializing in telecom passive infrastructure and integrated energy management, with a turnover of over ₹2,400 crore and operations across India, Myanmar, and Africa.
- Company offers a diverse portfolio comprising telecom power and energy equipment, ICT products, and end-to-end services, including product lifecycle management, tower & fiber O&M, installation, and equipment upgrades.
- Mobile data usage in India surged to 23GB/user/month in 2023, a 35x jump since 2013, driven by rising digital adoption and rapid 4G/5G expansion, placing India among the world's largest telecom markets alongside China.
- India had 1,165.5 million wireless users in FY24, making up 97.2% of the telecom market, with growth rebounding post-pandemic and SIM consolidation.
- Pace Digitek executes diverse projects across telecom towers & fiber, solar & BESS, ICT solutions, and power transmission and distribution.
